SKILLS

- Front End Web Development
- HTML
- CSS
- JavaScript
- TypeScript
- React Js
- Next Js
- Redux and RTK
- Material UI

CERTIFICATIONS

- Web Development
- React Js
- Next Js

PROFESSIONAL EXPERIENCE

Frontend Developer

@ IHIFIX | 2022 - Present

- 1. Work closely with the entire development team to create a user flow and user role for every project to be worked on.
- 2. Closely follow the design system when implementing UI from the design team, also communicate closely with the design team to review any irrelevance, omission, or errors.
- 3. Use CSS media-Query properties or Material UI Breakpoints API to ensure a clean responsive design that is impressive on all screen sizes.
- 4. Implement proper form validation using JavaScript, this ensures that users don't input wrong or invalid details during sign-up or login.
- 5. Utilize context and redux with redux-toolkit to manage the app-wide state in my application.
- 6. Carefully read the documentation when integrating third-party packages/apps into the project or app I work with.
- 7. Work with all four types of request methods (GET, POST, PATCH, DELETE) when working with databases like MongoDB and Firebase to store application data.
- 8. Basic understanding of Node.js, talk clearly to the back-end team about what kind of data I need from the server or send to the server and how it should be structured.
- 9. Tutor frontend newbies on the fundamentals of HTML, CSS, and Vanilla JavaScript.
